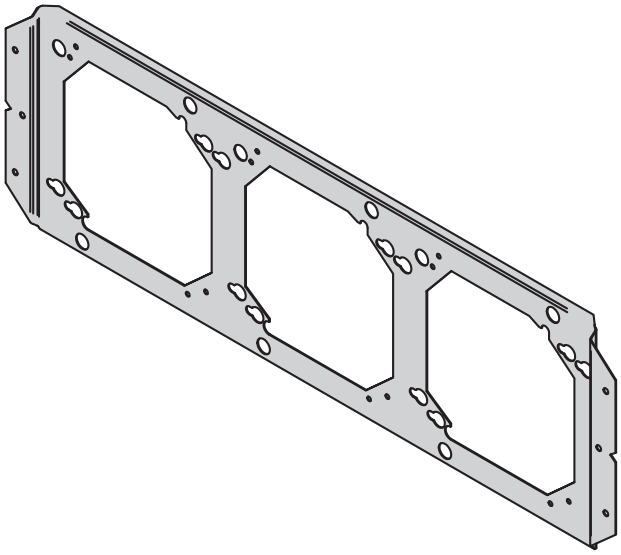
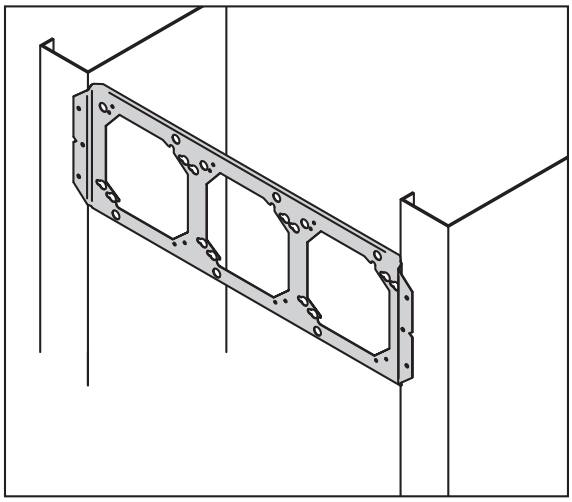
BMB – Rigid Box Mounting Bracket

Available Finishes / Materials:

PG -- Pre-Galvanized zinc

Standard Finish: PG





- Eliminates the need for electrical boxes in low voltage installations.
- Supports electrical boxes, plaster rings, or low voltage devices
- Use with STS8 screws, see page 75.
- **Material:** Steel
- **Finish:** Pregalvanized

Catalog No.	Stud Centers	Supports	Box Qty
BMB16	16"	Mounts up to three 4" and 4-11/16" boxes, plaster rings	25

Material Specifications and Finishes

Carbon Steel – ASTM A1011-00 SS GR 33 or ASTM A1011-00CS Type B

PG – ASTM A653 G-90 Pre-galvanized zinc is produced by continuously rolling steel coils or sheets through molten zinc at the mills. The coils or sheets are slit to size and fabricated by forming, shearing or punching to produce the finished product. During fabrication cut edges are not generally zinc coated; however, the zinc near the uncoated metal becomes a sacrificial anode to protect the bare areas.

Note: Specifications subject to change without notice.
